FOOD PACKAGING

From Ideas to Bowls
Unveiling Our Bowls Manufacturing Story

01

CUSTOMER ORDER

Begin by getting in touch with our sales team. You can reach out through email, phone or our website.

03

PRINTING

Need smaller quantity ? Contact us to discuss options and find the best solution for your needs. We accommodate orders starting from 10.000 pieces.

05

QUALITY CONTROL TESTS

We assess the strenght and sturdiness of our paper bowls to guarantee they withstand handling and usage without compromising quality.

07

SHIPMENT

After the packaging of your paper bowls is finalized and quality assured, they are prepared for shipment.

02

DESIGN

Our graphic designers use ideas and inspirations to create your customize paper bowls.

04

PRODUCTION

Our cutting-edge production facility is optimized for high-speed and high capacity paper bowl manufacturing.

06

PACKAGING

Once the bowls pass quality assurance, they are sent to packaging department where they are packaged and prepared for shipping.

PLA coated paper bowls

Polylactic acid, also known as PLA, is a thermoplastic monomer derived from renewable, organic sources such as corn starch or sugar cane. The biobased nature of PLA means that it reduces our carbon footprint while also contributing to the circular economy through mechanical and chemical recycling.

The compostability of PLA enables the reduction of greenhouse gas emissions via diversion of organic wastes from the landfill through industrial composting.

plastic free paper bowls

Plastic free paper bowl is designed by incorporating the eco friendly aqueous dispersion tech instead of conventional plastic lining. This bowl is Plastic Free and OBA-free.

With its non-plastic nature, it can be composted within 12 weeks in the industrial compostable facility. It can also be made recyclable without additional processing.
